The Nomenclature of Corrinoids (1973 Recommendations). IUPAC–IUB Commission on Biochemical Nomenclature (CBN) 1

Nomenclature of Tocopherols and Related Compounds. Recommendations (1973). IUPAC–IUB Commission on Biochemical Nomenclature (CBN) 11

Nomenclature of Quinones with Isoprenoid Side-Chains. Recommendations (1973). IUPAC–IUB Commission on Biochemical Nomenclature (CBN) 15

Proteins

The composition and proposed subunit structure of egg-white β-ovomucin. The isolation of an unreduced soluble ovomucin.
By D. S. Robinson & J. B. Monsey 55

Physical-chemical properties of C-phycocyanin isolated from an acido-thermophilic eukaryote, *Cyanidium caldarium*.
By O. H. W. Kao, M. R. Edwards & D. S. Berns 63

Isolation and characterization of a variant of ovomucoid.
By A. Waheed & A. Salahuddin 139

A comparative study of some kinetic and spectral properties of guanidinated and native cytochrome *c* (*Short Communication*).
By T. Brittain & C. Greenwood 175

The infrastructure of valyl-transfer ribonucleic acid synthetase from yeast (*Short Communication*).
By C. J. Bruton 191

Nucleic Acids

The effects of oestradiol-17β on the ribonucleic acid polymerases of immature rabbit uterus.
By N. M. Borthwick & R. M. S. Smellie 91

Effect of allylisopropylacetamide on nuclear ribonucleic acid synthesis in rat liver (*Short Communication*).
By M. K. Sardana, M. R. Satyanarayana Rao & G. Padmanaban 185

PAGE

Lipids

The occurrence of a phosphorylated glycosphingolipid in *Aspergillus niger* (*Short Communication*).
By P. J. Brennan & J. Roe 179

Carbohydrates

The teichuronic acid of cell walls of *Bacillus subtilis* W23 grown in a chemostat under phosphate limitation (*Short Communication*).
By J. Wright & J. E. Heckels 187

Enzymology

Glycogen phosphorylase and its converter enzymes in haemolysates of normal human subjects and of patients with type VI glycogen-storage disease. A study of phosphorylase kinase deficiency.
By B. Lederer, F. van Hoof, G. van den Berghe & H.-G. Hers 23

The effect of zinc on the activity and fluorescence of carbonic anhydrase holoenzymes.
By T. R. Hesketh & M. T. Flanagan 37

Aspergillus oryzae acid proteinase. Purification and properties, and formation of π-chymotrypsin.
By R. Davidson, A. Gertler & T. Hofmann 45

Chemical modification of amino groups and guanidino groups of trypsin. Preparation of stable and soluble derivatives.
By A. Nureddin & T. Inagami 71

Characterization of jack-bean α-D-mannosidase as a zinc metalloenzyme.
By S. M. Snaith 83

Purification and heterogeneity of inorganic pyrophosphatase of pig scapula cartilage.
By R. Felix & H. Fleisch 103

Properties of inorganic pyrophosphatase of pig scapula cartilage.
By R. Felix & H. Fleisch 111

Poly(adenosine diphosphate ribose) polymerase in *Physarum polycephalum*.
By M. D. Brightwell, C. E. Leech, M. K. O'Farrell, W. J. D. Whish & S. Shall 119

PAGE

Purification of D-alanine carboxypeptidase from *Escherichia coli* B on a penicillin–Sepharose column.
By M. Gorecki, A. Bar-Eli, Y. Burstein, A. Patchornik & E. B. Chain 131

Kinetic studies on the reaction between cytochrome *c* oxidase and ferrocytochrome *c*.
By M. T. Wilson, C. Greenwood, M. Brunori & E. Antonini 145

PAGE

Transamidase kinetics. Amide formation in the enzymic reactions of thiol esters with amines.
By P. Stenberg, C. G. Curtis, D. Wing, Y. S. Tong, R. B. Credo, A. Gray & L. Lorand 155

Subcellular localization and properties of mouse adrenal C_{19}-steroid 5β-reductase.
By W. Collins & E. H. D. Cameron 165

A deactivating conformational change induced by reduced nicotinamide–adenine dinucleotide phosphate in a *Neurospora* glutamate dehydrogenase (*Short Communication*).
By M. G. Gore & M. Iwatsubo 181

Contents of Volume 147, No. 2

PAGE

Proteins

Separation of a series of chromophores and fluorophores present in elastin.
By D. P. Thornhill 215

The actin content of fibroblasts.
By D. Bray & C. Thomas 221

The interaction between bovine serum albumin and surfactants.
By M. N. Jones, H. A. Skinner & E. Tipping 229

Comparison of the amino acid sequences of the variable domains of two homogeneous rabbit antibodies to type III pneumococcal polysaccharide.
By J.-C. Jaton 235

The preparation and some properties of mammalian cytochrome *c* modified with 2-hydroxy-5-nitrobenzyl bromide.
By T. Brittain & C. Greenwood 253

Purification, properties and amino acid sequence of atypical cytochrome *c* from two protozoa, *Euglena gracilis* and *Crithidia oncopelti*.
By G. W. Pettigrew, J. L. Leaver, T. E. Meyer & A. P. Ryle 291

The partial amino acid sequence of the extracellular β-lactamase I of *Bacillus cereus* 569/H.
By D. R. Thatcher 313

Ligand binding to ferrocytochrome *c* at high pH.
By T. A. Moore, C. Greenwood & M. T. Wilson 335

PAGE

The amino acid sequence of plastocyanin from spinach (*Spinacia oleracea* L.).
By M. D. Scawen, J. A. M. Ramshaw & D. Boulter 343

The distinguishing characteristics of the plasma membrane are its exposed proteins (*Short Communication*).
By R. E. Gates, D. R. Phillips & M. Morrison 373

Nucleic Acids

Ribonucleic acid synthesis in isolated rat liver nuclei under conditions of ribonucleic acid processing and transport.
By D. J. McNamara, J. Racevskis, D. E. Schumm & T. E. Webb 193

The use of ammonium acetate in the precipitation of ribonucleic acid (*Short Communication*).
By H. H. Osterburg, J. K. Allen & C. E. Finch 367

Small Molecules

Decarboxylation of uroporphyrin by heating at atmospheric pressure.
By T. K. With 249

Enzymology

Analysis of the forms of acetylcholinesterase from adult mouse brain.
By E. D. Adamson, S. E. Ayers, Z. A. Deussen & C. F. Graham 205

Ethylenediamine-*NN'*-tetra-acetate-dependent amino acid-stimulated inactivation of mouse ovarian alkaline phosphatase activity.
By T. A. Bramley 259

GENERAL BOOKBINDING CO.
75 256AA 2 013 1 C 2624
QUALITY CONTROL MARK

PAGE

Some properties of the citrate synthase from the extreme halophile, *Halobacterium cutirubrum*. *By* A. Higa & J. J. Cazzulo 267

The sequences of the coenzyme-binding peptide in the cytoplasmic and the mitochondrial aspartate aminotransferases from sheep liver. *By* M. Campos-Cavieres & C. P. Milstein 275

Acetylation of *S*-substituted cysteines by a rat liver and kidney microsomal *N*-acetyltransferase. *By* R. M. Green & J. S. Elce 283

A study of the pH- and temperature-dependence of the reactions of yeast alcohol dehydrogenase with ethanol, acetaldehyde and butyraldehyde as substrates. *By* C. J. Dickenson & F. M. Dickinson 303

The purification and properties of L-histidine–2-oxoglutarate aminotransferase from *Pseudomonas testosteroni*. *By* A. J. Hacking & H. Hassall 327

The equilibrium position of the reaction of bovine liver glutamate dehydrogenase with pyridoxal 5′-phosphate. A demonstration that covalent modification with this reagent completely abolishes catalytic activity. *By* S.-S. Chen & P. C. Engel 351

PAGE

Activation of membrane-bound high-affinity calcium ion-sensitive adenosine triphosphatase of human erythrocytes by bivalent metal ions (*Short Communication*). *By* H. Pfleger & H. U. Wolf 359

Purification of porcine enterokinase by affinity chromatography (*Short Communication*). *By* D. A. W. Grant & J. Hermon-Taylor 363

The nature of the binding site for aromatic compounds in glycogen phosphorylase *b* (*Short Communication*). *By* G. Soman & G. Philip 369

Nature of the multiple forms of sweet-potato glucose phosphate isomerase (*Short Communication*). *By* T. L. Phillips, D. W. Porter & R. W. Gracy 381

Intermolecular Organization

Interaction of bilirubin with reconstituted collagen fibrils. *By* C. L. Kapoor 199

Co-operative binding of oxytocin to bovine neurophysin II (*Short Communication*). *By* D. B. Hope, M. Wälti & D. J. Winzor 377

Contents of Volume 147, No. 3

PAGE

Proteins

A study of kinetics of iron and copper binding to hen ovotransferrin. *By* C. F. Phelps & E. Antonini 385

The major human erythrocyte membrane protein. Evidence for an S-shaped structure which traverses the membrane twice and contains a duplicated set of sites. *By* R. E. Jenkins & M. J. A. Tanner 393

Identification of amino acid thiohydantoins directly by thin-layer chromatography and indirectly by gas–liquid chromatography after hydrolysis. *By* M. Rangarajan & A. Darbre 435

The amino acid sequence of a carbohydrate-containing fragment of hen ovotransferrin. *By* I. B. Kingston & J. Williams 463

The amino acid sequence of dromedary pancreatic ribonuclease. *By* G. W. Welling, G. Groen & J. J. Beintema 505

PAGE

Quantitative interpretation of concentration-dependent migration in gel chromatography of reversibly polymerizing solutes. *By* P. A. Baghurst, L. W. Nichol, A. G. Ogston & D. J. Winzor 575

Chemical structure of two fragments of human serum albumin and their location in the albumin molecule. *By* F. Bellon & C. Lapresle 585

A kinetic method to establish the specificity of spin labelling of macromolecules (*Short Communication*). *By* J. R. Griffiths, N. C. Price & G. K. Radda 609

Hydrodynamic changes accompanying the loss of metal ions from concanavalin A (*Short Communication*). *By* W. H. Sawyer, R. Dabschek, P. R. Nott, B. K. Selinger & I. D. Kuntz 613

PAGE

Glucose- and phlorrhizin-protected thiol groups in pig intestinal brush-border membranes (*Short Communication*).
By M. W. Smith, D. R. Ferguson & K. A. Burton 617

Nucleic Acids

The mechanism of inhibition of ribonucleic acid synthesis by 8-hydroxyquinoline and the antibiotic lomofungin.
By R. S. S. Fraser & J. Creanor 401

Stability of pyrimidine oligodeoxyribonucleotides released during degradation of deoxyribonucleic acid with formic acid–diphenylamine reagent.
By W. P. Tate & G. B. Petersen 439

Ribosomal and informational ribonucleoprotein complexes of animal cells. Study on rat liver ribonucleic acids as constituents of ribonucleoprotein complexes by chromatography on nucleoprotein–Celite columns.
By A. V. Lichtenstein, R. P. Alechina & V. S. Shapot 447

Preparation of polyribosome aminoacyl-transfer ribonucleic acid from the muscle of chick embryos.
By M. Nwagwu 473

Chemical and metabolic properties of adenosine diphosphate ribose derivatives of nuclear proteins.
By J. A. Smith & L. A. Stocken 523

A simple method of characterizing mitochondrial ribonucleic acid (*Short Communication*).
By D. Haldar, B. K. Waters & K. B. Freeman 621

The presence of a high-molecular-weight (guanine-plus-cytosine)-rich segment at the 3′ end of rabbit 28S ribosomal ribonucleic acid (*Short Communication*).
By A. A. Hadjiolov, R. A. Cox & P. Huvos 625

Small Molecules

pH-Dependence of ^{13}C chemical shifts and $^{13}C,H$ coupling constants in imidazole and L-histidine (*Short Communication*).
By R. E. Wasylishen & G. Tomlinson 605

Enzymology

Properties of the histidine residues of indole–chymotrypsin. Implications for the activation process and catalytic mechanism.
By W. H. Cruickshank & H. Kaplan 411

An allosteric model for ribonuclease.
By E. J. Walker, G. B. Ralston & I. G. Darvey 425

PAGE

Purification of multiple forms of the soluble 17α-hydroxy steroid dehydrogenase of rabbit liver.
By S. Hasnain & D. G. Williamson 457

Glutamate decarboxylase from barley embryos and roots. General properties and the occurrence of three enzymic forms.
By K. Inatomi & J. C. Slaughter 479

Purification and properties of *S*-alkyl-L-cysteine lyase from seedlings of *Acacia farnesiana* Willd.
By M. Mazelis & R. K. Creveling 485

Polarographic assay and intracellular distribution of superoxide dismutase in rat liver.
By D. D. Tyler 493

Purification and characterization of two glutathione *S*-aryltransferase activities from rat liver.
By P. Askelöf, C. Guthenberg, I. Jakobson & B. Mannervik 513

Selective inhibition of cholesterol synthesis by cell-free preparations of rat liver by using inhibitors of cytoplasmic acetoacetyl-coenzyme A thiolase.
By D. P. Bloxham 531

A study of the oxidation of butan-1-ol and propan-2-ol by nicotinamide–adenine dinucleotide catalysed by yeast alcohol dehydrogenase.
By C. J. Dickenson & F. M. Dickinson 541

Acyl intermediates in penicillopepsin-catalysed reactions and a discussion of the mechanism of action of pepsins.
By M. Takahashi & T. Hofmann 549

The hydroxylation of tyrosine by an enzyme from third-instar larvae of the blowfly *Calliphora erythrocephala*.
By R. N. Pau & C. Kelly 565

A chemistry for the immobilization of enzymes on nylon. The preparation of nylon-tube-supported hexokinase and glucose 6-phosphate dehydrogenase and the use of the co-immobilized enzymes in the automated determination of glucose.
By D. L. Morris, J. Campbell & W. E. Hornby 595

Intermolecular Organization

Association of xanthine oxidase with the bovine milk-fat-globule membrane. Nature of the enzyme–membrane association.
By M. S. Briley & R. Eisenthal 417

Index 629
